Library Book Borrowing App

Overview

The Library Book Borrowing App is a mobile application designed to simplify the process of borrowing, tracking, and managing library books. It provides users with an intuitive interface to search for books, borrow them, monitor due dates, and manage returns efficiently.

1. Dashboard Screen

The Dashboard serves as the main entry point of the application.

Features:

- Displays total number of books borrowed
- Shows number of books due soon
- Quick access button to borrow a new book
- List of currently checked-out books
- Option to view all borrowed books

Purpose:

To give users a quick summary of their borrowing activity and easy navigation to other features.

2. Borrow Book Screen

This screen allows users to search and borrow new books.

Features:

- Search bar to enter book title or ISBN
- Option to scan ISBN (if implemented)
- Search button to fetch results
- List of available books
- “Borrow” button to check out a book
- “Renew” option if already borrowed

Purpose:

To help users easily find and borrow books from the library.

3. Borrowing List Screen

This screen displays all borrowed books.

Features:

- Tabs for:
 - Borrowed Books
 - Due Soon
- List of books with:
 - Title
 - Due date
- Easy navigation to book details

Purpose:

To allow users to track all borrowed books and identify upcoming due dates.

4. Book Details Screen

This screen provides detailed information about a selected book.

Features:

- Book title and author name
- Due date
- Short description of the book
- “Renew Loan” button
- “Return Book” button

Purpose:

To give users detailed information and allow them to manage their borrowed books.

Key Functionalities

- Book search (by title or ISBN)
- Borrow books

- View borrowed books
 - Track due dates
 - Renew borrowed books
 - Return books
-

Benefits

- Simplifies library management for users
- Reduces chances of missing due dates
- Provides a user-friendly experience
- Saves time with quick search and actions
